The Kingfisher History Encyclopedia (Kingfisher Family Of Encyclopedias)

Synopsis

What was the Black Death? Who fought in the Hundred Years' War? What do people mean by the Counter-Reformation? With its simple chronological and thematic arrangement, The Concise Kingfisher History Encyclopedia puts the whole of history, and the legacy of human civilization - from the Ice Age to the Information Age - at the fingertips of today's children. Divided into ten clearly defined time periods (from 40,000 B.C. to the present day), The Kingfisher History Encyclopedia covers every major empire, civilization, revolution, and war, as well as the technological and cultural advances that have left their mark on history. Three colorful spreads at the end of each section are devoted to the Art, Architecture, and Science and Technology of each major time period. A comprehensive index, and at-a-glance summaries of each period, make this a valuable resource for help with school assignments, as well as for casual browsing. Special Features: Bold headwords, and a concise definition of the subject appear at the top of the page. Text can be read section by section or as a complete article. Illustrated biographies and key date boxes provide essential information. Timeline throughout puts history in context and shows progression of world events.

Customer Reviews

I have recently begun homeschooling my 6th grader, and am using The Well Trained Mind as a curriculum guide. This book was listed as a must-have for a classical education, which is based heavily in literature and history. I must say that when we received the Kingfisher History Encyclopedia, it looked very impressive. It is a hefty volume, with colorful pages and a timeline

which runs across the top of the pages. However, after only a few weeks of use, my daughter has come to dread the sight of this book whenever it is time for history lessons. It is very dry reading. The one to two-page spreads for each topic/culture/era have so little valuable content, that there is little opportunity for the spark of interest to be ignited. They have so condensed the information, that it is mostly a list of dates, names, etc. And there are boxes every couple of pages listing the same dates over again. The text is written chronologically, so each time you turn the page a different culture is discussed, and what they were doing during that time period. This concept sounds better on paper than in practical use. While the time periods overlap somewhat, it does tend to jump around a quite bit. The continuity of what should be exciting and intriguing becomes very choppy and disjointed and as a result frustrating and boring. What might be interesting stuff becomes distracting and in some cases irritating when it interrupts another story. For example, the rise and fall of Rome, while severely abridged, may have still interested my child, if it had not been broken up by seven other topics. Huge chunks of time (several centuries)are condensed into a paragraph, or even a sentence or two. Other chunks go unmentioned.
