Leukemia (The Biology Of Cancer)

Synopsis

Leukemia, or cancer of the blood or bone marrow, occurs in both acute and chronic forms. While the exact causes of the disease are not known, several risk factors have been identified. There are four major types of leukemia: acute myeloid leukemia (AML), chronic myeloid leukemia (CML), acute lymphoid leukemia (ALL), and chronic lymphoid leukemia (CLL), and treatments include chemotherapy, radiation, and bone marrow transplants. Leukemia discusses the science of leukemia, theories about its causes, the history of the disease, and the current treatments and how they work.

Book Information

Series: Biology of Cancer

Library Binding: 168 pages

Publisher: Chelsea House Pub (Library); 1 edition (April 1, 2009)

Language: English

ISBN-10: 0791088227

ISBN-13: 978-0791088227

Product Dimensions: 7.4 x 0.6 x 9.3 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 starsÂ Â See all reviewsÂ (2 customer reviews)

Customer Reviews

Good images, simple vocabulary. Text with general information, but may be helpful to people that unknow subject. It is easy to understand... Advisable :)

Yes, the book was what I looking for an overview of the blood cancer leukemia.
