Customer Reviews

As a grade school teacher, I have been trained in and taught a variety of different math curricula. Saxon is the best there is. It is spiral and sequential. It breaks math concepts down into easy to understand steps that then build on each other. Course 1 is equal to 6th grade math. This year, I am homeschooling a struggling 5th grader. This is on hand for when we master the 6/5 book. If you need a choice for home - tutoring or homeschooling, Saxon is it!

My 11-year-old son is using this book and so I help him out with homework from time to time, which is how I came across this book. And I have to say, Stephan Hake has really thought things through. It's like every single problem was included for a reason that is part of a master plan to impart knowledge to the student. Plus, the book has a nice glossary and index, which makes the learning process that much easier. Overall, this dad gives Saxon Math a big thumbs up! Nice job!

The order was delayed due to an inventory supply issue, but it finally arrived in new condition within several weeks of the order. This is a hardcover math text book with lessons and problems throughout each chapter and section. Our kids have used Saxon math previously in private school, at Challenger School, and it is great because it constantly reinforces concepts already learned while

introducing new complex ones. I would recommend this book as a supplement to any public school education also.

Love this Math book! Wish all public school would use this no nonsense approach. Consistent, spiral learning that gives the student a sense of accomplishment!

This book is in great condition and exactly what I was shopping for my son. Thank you for the quick service.

The book is awesome to keep at home so that my son doesn't have to lug it home from school everyday. Can't beat the price. There was some writing in it but otherwise in great shape.

The book was in excellent condition. The only thing is that it had many answers through all the book (correct and incorrect). Still it was sold for an excellent price.

I love Saxon Math - Students understand concepts better, it encourages critical thinking and problem solving skills, it meets state standards - what more can I say!
